

Platts: Global Petrochemical Prices Fell 4% in October

Drop in crude oil prices drag petrochemical values lower

PR Newswire
LONDON

LONDON, Nov. 20, 2014 /PRNewswire/ -- Prices in the \$3-trillion-plus global petrochemicals market extended its fall by 4% in October, as upstream energy prices continued to slide. Petrochemical prices, expressed as a monthly average, fell to \$1,324 per metric ton (/mt) from \$1,384/mt in September, according to the just-released monthly [Platts Global Petrochemical Index](#) (PGPI).

The PGPI is a benchmark basket of seven widely used petrochemicals and is published by [Platts](#), a leading global energy, petrochemicals and metals information provider and a top source of benchmark price references. The PGPI fell \$60 from September. On a year-over-year basis, petrochemical prices were down 2% from the same month last year.

"The PGPI decline in October doesn't actually capture how fast these markets have been on the decline," said Jim Foster, director of petrochemical analysis at Platts. "Prices have fallen 10% since October 8, averaging \$8/mt a day, after a brief price increase in the first week of the month."

PLATTS GLOBAL PETROCHEMICAL INDEX IN DOLLARS PER METRIC TON

The daily price reflected as a monthly average

Oct 2014	Change	Monthly % change	Annual % change	Oct 2013	Sept 2014	Aug 2014	July 2014	June 2014
---								----
\$1,324		-4%	-2%	\$1,352	\$1,384	\$1,427	\$1,446	\$1,387
-----		---	---	-----	-----	-----	-----	-----

The decline in prices comes amid falling crude oil and naphtha prices. Dated Brent prices, on average, dropped 10% in October. Over the same period, naphtha prices were down 15%.

Petrochemicals are used to make plastic, rubber, nylon and other consumer products and are utilized in manufacturing, construction, pharmaceuticals, aviation, electronics and nearly every commercial industry.

OLEFINS

Prices of olefins - a group of hydrocarbon compounds which are the building blocks to many petrochemical products used to produce everyday goods - were lower in October. Ethylene prices fell 6% to \$1,324/mt and propylene prices were down 1% to \$1,311/mt.

Polyethylene, a plastic manufactured from ethylene, saw prices fall 2% in October, while polypropylene prices fell 1% during the same period.

AROMATICS

Prices of aromatics - a group of scented hydrocarbons with benzene rings used to make a variety of petrochemicals - fell sharply in October. Benzene prices fell 7% to \$1,181/mt in October, while toluene prices fell 8% to \$991/mt. The largest drop of any component in the PGPI was in the paraxylene market, which fell 12% to \$1,063/mt.

The price decreases in global petrochemical markets occurred amid a mixed performance by global equity markets in October. The Nikkei 225 and Dow Jones Industrial Average climbed 2% during the month, while the London Stock Exchange Index (FTSE) fell 2%.
