

U.S. Land Rig Count Experiences First Monthly Drop in 2017

HOUSTON, Oct. 9, 2017 /PRNewswire/ -- Platts RigData, a forecasting and analytics unit of S&P Global Platts, today announced the U.S. rig count for September 2017 was 1,043, down 28 (3%) from August 2017, and up 460 (79%) from September 2016. This rig count includes U.S. onshore, U.S. inland waters, and U.S. offshore Gulf of Mexico drilling rigs.

- **September U.S. land rig count:** 1,002, down 25 (2%) from the previous month and up 457 (84%) from September 2016
- **September U.S. inland waters and Gulf of Mexico rig count:** 41, down 3 (7%) from the previous month and up 3 (8%) from September 2016

"The slack in the rig count for U.S. land activity was heavily influenced by weather during September," said **Trey Cowan, senior industry analyst, Platts RigData, an analytics unit of S&P Global Platts**. "I would not be surprised if next month's count firms toward levels seen in August, prior to the storms, as producers play a little catchup."
