

February 2018 Total U.S. Rig Count Reveals Lack of Offshore Progression - S&P Global Platts

HOUSTON, March 5, 2018 /PRNewswire/ -- S&P Global Platts Analytics, today announced the total U.S. rig count for February 2018 was 1,077, up 7 (+1%) from January 2018, and up 243 (+29%) from February 2017. This rig count includes U.S. onshore, U.S. inland waters, and U.S. offshore Gulf of Mexico drilling rigs.

- **February U.S. land rig count:** 1,036, up 9 (+1%) from the previous month and up 245 (+31%) from February 2017
- **February U.S. inland waters and Gulf of Mexico rig count:** 41, down 2 (-5%) from the previous month and down 2 (-5%) from February 2017

S&P Global Platts

"Trends for inland water and offshore drilling continue to prove lackluster support for developing these resources," said S&P Global Platts senior industry analyst Trey Cowan. "The current count of 41 is only four rigs above the lowest monthly point recorded in the past two calendar years. The present lack of investment in the Gulf of Mexico no doubt raises eyebrows at the U.S. Department of Interior and does not bode well for the lease auction set for March 21, 2018. However, producers may be able to find some bargains when Lease Sale 250 commences for blocks situated in the Outer Continental Shelf."
