

Shallow Vertical Wells Get Lift in October; Overall U.S. Rig Count Remains Flat Versus September

Eyes on Colorado's Proposition 112 in November 6 Midterm Elections

HOUSTON, Nov. 5, 2018 /PRNewswire/ -- S&P Global Platts Analytics, today announced the total U.S. rig count for October 2018 was 1,174, down 1 (0%) from September 2018, and up 126 (+12%) from October 2017. This rig count includes U.S. onshore, U.S. inland waters, and U.S. offshore Gulf of Mexico drilling rigs.

- **October U.S. land rig count:** 1,144, down 2 (0%) from the previous month and up 124 (+12%) from October 2017
- **October U.S. inland waters and Gulf of Mexico rig count:** , up 1 (+3%) from the previous month and up 2 (+7%) from October 2017

"While month-over-month rig count performance is basically flat, it's worth taking a look under the hood, where we see an increase in rigs for drilling conventional, shallow natural gas wells, evidence that smaller-scale natural gas producers were taking advantage of the visibly stronger natural gas prices," **said S&P Global Platts Analytics Senior Industry Analyst Trey Cowan.**

Natural gas prices, according to the spot, physical market price of Henry Hub, as assessed by S&P Global Platts, showed a rise of 8% during October.

"Colorado could hold the most volatility in the months ahead," said Cowan. "If Proposition 112* is approved at the U.S. November 6 Midterm Elections, we could see a rush to get wells drilled before permits expire and then a precipitous fall in drilling for the state."
