

Q2 broadcast M&A market stalled due to COVID-19 crisis

Radio accounts for \$23.3 million and TV for \$67.6 million in Q2 2020 deal volume

MONTEREY, Calif., July 6, 2020 /PRNewswire/ -- U.S. broadcast station mergers and acquisitions (M&A) volume reached a total of \$90.9 million in the second quarter of 2020 as tracked by Kagan, a media research group within S&P Global Market Intelligence. This constitutes the sector's lowest quarterly deal volume in Kagan's records, which go back 37 years to 1983.

While first quarter results were largely unaffected by the current crises caused by the COVID-19 outbreak, the deal market all but collapsed in April.

The last large deal was announced on April 3. Mission Broadcasting Inc. agreed to acquire three digital TV stations from Marshall Broadcasting Group Inc. for \$49 million, to be applied against Marshall's existing loans payable to Mission. Mission Broadcasting then entered shared services agreements with Nexstar Media Group for all three stations.

This transaction, negotiated largely before the COVID-19 outbreak, accounts for more than half (53.9%) of the second quarter's total U.S. broadcast M&A volume.

On May 28, four companies, fully or partially owned by Mr. George S. Flinn, Jr., announced the sales of their six TV stations to Radiant Life Ministries, Faith Community Television and Memphis Educational Television for a total of \$5.7 million. On the same day, Gray Television reported the acquisition of two low-power TV stations in Alaska for \$1.5 million.

On June 26, Sinclair Television Group Inc. announced the \$8.5 million acquisition of two Class-A TV stations in the Washington, D.C., market from WMTM LLC, a unit of Loop Media Inc.

Those were the only noteworthy TV transactions in the second quarter. We do not expect the TV M&A market to pick up again with large transactions until after the November 2020 elections.

The radio market had even less to report. In a forgiveness of about \$3.0 million in debt, three FM stations in or near the St. Louis, Mo., market were transferred from Mr. Dennis Wallace to East Central Broadcasting LLC.

Only four other transactions exceeded \$1 million each.

In the Philadelphia market, VP Broadcasting announced the acquisition of an AM station with an FM translator from Aztec Capital Partners for \$1.5 million.

In the small La Crosse, Wis., market, an AM/FM combo is being sold from Mississippi Valley Broadcasters LLC to Magnum Communications Inc. for \$1.4 million.

A similar \$1.4 million will be paid for a Crooksville, Ohio, FM station, sold by Y Bridge Broadcasting Inc. to AVC Communications Multimedia Group LLC.

A non-rated AM/FM combo with two FM translators in non-rated Washington, Ind., is going to be sold from DLC Media Inc. to Shake Broadcasting LLC for \$1.35 million.

There were another 88 radio transactions in the second quarter, but none of them exceeded a million dollars and more than three quarters of them (67) took place in small markets and non-rated areas. Depending on the duration of the current situation, we expect a growing number of small radio station owners to exit the business, but we also expect a swift return to larger transactions once the crisis is resolved.

About S&P Global Market Intelligence

At S&P Global Market Intelligence, we know that not all information is important—some of it is vital. We integrate financial and industry data, research and news into tools that help clients track performance, generate alpha, identify investment ideas, understand competitive and industry dynamics, perform valuations and assess credit risk. Investment professionals, government agencies, corporations and universities globally can gain the intelligence essential to making business and financial decisions with conviction.

S&P Global Market Intelligence is a division of S&P Global (NYSE: SPGI). For more information, visit www.spglobal.com.
