NEW YORK, Jan. 6, 2021 /<u>PRNewswire</u>/ -- S&P Dow Jones Indices announced today that indicated **dividend net changes (increases less decreases) for U.S. domestic common stocks increased \$9.5 billion** during Q4 2020, compared to a decline of \$2.3 billion in Q3 2020, and a gain of \$10.6 billion in Q4 2019.

For Q4 2020, aggregate increases amounted to \$13.9 billion, up 64.2% from the \$8.4 billion increase of Q3 2020 and up 15.7%, from Q4 2019's \$12.0 billion. Aggregate dividend cuts decreased 59.8% to \$4.3 billion from Q3 2020's \$10.8 billion in cuts, and was up 221% from the \$1.3 billion in cuts for Q4 2019.

For 2020, the net dividend rate fell \$40.5 billion, compared to a gain of \$45.4 billion for 2019, as increases were \$41.4 billion versus \$56.6 billion, and decreases were \$82.2 billion compared to \$11.1 billion for 2019.

"Many companies have stabilized their operations and sales and are returning cash flow to the dividend market," said **Howard Silverblatt, Senior Index Analyst at S&P Dow Jones Indices.** Silverblatt continued, "some issues which had suspended their payments after the start of COVID, have resumed payments. The \$13.9 billion in Q4 increases represented a 15.7% increase over the pre-COVID Q4 2019 period. For the year, the \$82.2 billion in cuts and suspensions took their toll but now appear to have mostly abated as increases of \$41.4 billion helped limit the damage. Looking ahead to 2021, absent a failure on the COVID treatment side, dividends should be impressive with the S&P 500 expected to post a new record payment."
