"Labor demand in the U.S. has risen to unprecedented levels this year, with companies across sectors scrambling to hire workers as the economy continues to recover from Covid-19. Against that backdrop, it is not surprising to see a significant increase in job listings by S&P 500 companies," said Reid Steadman, Managing Director and Global Head of ESG and Innovation Indices at S&P Dow Jones Indices.

Steadman continued, "The sectors with the biggest increases in job listings this year have some of the biggest stock returns so far in 2021, with Energy companies showing the second biggest job listings growth (119.8%) and the largest share appreciation

(39.7%). On the opposite end, Consumer Staples companies which have seen the lowest job listing growth this year (28%), are also among the worst performers in the S&P 500 index with YTD returns of 5.1% compared to the benchmark's 18.3%"

"It's a reversal of trends from 2020 when Consumer Staples companies were among the least adversely impacted by Covid-19. Last year, job listings at Consumer Staples companies increased 20.5% compared to 9.7% among S&P 500 companies overall," concluded Steadman.

The S&P 500 LinkUp Jobs Indices are published weekly and are calculated using the sum of the weekly average job count from each S&P 500 company provided by LinkUp, an employment-focused data company that tracks and aggregates daily job openings directly from more than 60,000 company websites globally.

LinkUp's data are extensively quality checked during the actual gathering of data from individual company job sites to confirm integrity and accuracy of the number of job openings.
