NEW YORK, Jan. 4, 2022 /PRNewswire/ -- S&P Dow Jones Indices announced today that indicated **dividend net changes (increases less decreases) for U.S. domestic common stocks increased \$18.0 billion** during Q4 2021, compared to \$20.9 billion in Q3 2021, and \$9.5 billion in Q4 2020.

For 2021, the net dividend rate increased \$69.8 billion, compared to a net decline of \$40.8 billion for 2020, as increases were \$78.6 billion versus \$41.4 billion, and decreases were \$8.8 billion compared to \$82.2 billion for 2020.

"Dividends continued to move past the COVID recovery, as increases were strong, decreases remain historically low, and earnings, sales, and high margins have permitted companies to return to the business of returning shareholder wealth," said **Howard Silverblatt, Senior Index Analyst at S&P Dow Jones Indices**.

"Within the S&P 500, companies still appear cautious of increases, as they paid out the lowest percentage of quarterly earnings in over a decade, but still set a dividend payment record in Q4 and 2021. While COVID continues to dominate the headlines, the market continues to post significant gains, which has reduced yields. Based on the historical dividend increase rate and current indicated dividend rates, 2022 is on track to set another record in 2022, with COVID determining the increase amount."

Silverblatt concluded, "Another potential headwind is changes to the dividend treatment or tax rate, which is now being discussed in Washington."
