NEW YORK, March 15, 2022 /PRNewswire/ -- S&P Dow Jones Indices ("S&P DJI") announced today preliminary [S&P 500](#) stock buyback, or share repurchases, data for Q4 2021 and 2021.

Historical data on S&P 500 buybacks are available at www.spdji.com/indices/equity/sp-500.

Key Takeaways:

- **Q4 2021 share repurchases were a record \$270.1 billion**, up 15.1% from Q3 2021's record \$234.6 billion expenditure and up 106.8% from Q4 2020's \$130.6 billion.
- **325 companies reported buybacks of at least \$5 million for the quarter**, up from 309 in Q3 2021 and up from 244 in Q4 2020; 410 companies reported buybacks of at least \$5 million for 2021, flat from 2020; 383 companies did some buybacks for the quarter, up from 371 in Q3 2020 and up from 332 in Q4 2020; 422 companies did some buybacks for the year, down from 426 in 2020.
- **Buybacks remained top heavy with the top 20 companies accounting for 51.8% of Q4 2021 buybacks**, down from Q3 2021's 53.8%, down from the dominating 66.3% in Q4 2020, and up from the pre-COVID historical average of 44.5%.
- **For 2021, buybacks were a record \$881.7 billion, a 69.6% increase from the \$519.8 billion in 2020**, and up 9.3% from the record \$806.4 billion 2018 level.
- **Buybacks are expected to continue at a higher level for Q1 2022, even as prices have declined** as reduced prices will increase the number of shares purchased and lift earnings-per-share due to share reduction.
- **14.6% of companies reduced share counts used for EPS by at least 4% year-over-year** up from Q3 2021's 7.4% and Q2 2021's 5.4%, but still significantly down from Q4 2019's 20.7% rate.
- **S&P 500 Q3 2021 dividends increased 3.0% to a record \$133.9 billion** from Q3 2021's \$130.0 billion and were 10.1% greater than the \$121.6 billion in Q4 2020. For 2021, dividends were a record \$511.2 billion, up 5.8% on an aggregate basis from 2020's \$483.2 billion.
- **Total shareholder return of buybacks and dividends was a record \$404.0 billion in Q4 2021**, up 10.8% from Q3 2021's \$364.7 billion and up 60.2% from Q4 2020's \$252.2 billion.
- **Total shareholder return for 2021 increased to a record \$1.53 trillion** from 2020's \$1.39 trillion.

"Companies continued their record-breaking buybacks in Q4 2021 and accelerated their expenditures prior to the year-end ahead of any expected policy changes in 2022," said **Howard Silverblatt, Senior Index Analyst at S&P Dow Jones Indices**. "The record expenditures led to one out of seven companies in the S&P 500 increasing their earnings-per-share by at least 4% thanks to their newly lowered share count, up from the one-in-thirteen in Q3 2021. While the EPS uplift remained well below the one in four rate of 2019, the direction is clear, with declared new programs setting the stage for increased buying in 2022."

Outlook for Q1 2022:

Silverblatt added, "Current indications are that companies have maintained their buybacks through the recent downturn, which means they'll be getting more shares for their expenditures and reducing share count even further, resulting in higher EPS. Earnings, which have set a record in Q4, are expected to remain strong, but not set a record, with margins declining due to costs and supply issues, but still provide sufficient cash-flow to continue the buybacks, dividends, and growth."

"Q1 2022 buybacks are expected to set a new record, with a wider range of issues benefiting from the EPS lift. Beyond Q1 however, it is unclear, as inflation and the Russia-Ukraine conflict may reduce excess buybacks. At the minimum, companies are expected to cover exercised options, with stronger-cash-flow issues continuing to reduce shares. Given the strong base buying, expected earnings, even with a potential consumer slow-down and lower margins, buybacks could set another record in 2022."
