NEW YORK, Jan. 30, 2023 /PRNewswire/ -- S&P Global Market Intelligence, a provider of information services and solutions to global markets, today announced the launch of Country Risk Scores and Economic data and insights on its [S&P Capital IQ Pro](#) platform. The enhancements include workflow improvements, data visualizations for trend analyses, embedded mapping applications and inclusion in screener/Excel apps. Additional enhancements in the coming year will include the addition of the S&P Global Purchasing Manager Index™ (PMI), as well as other macroeconomic indicators and insights. The Country Risk and Economic data and insights will also be further enhanced with advanced data visualization and charting capabilities from ChartIQ, a premier charting provider for the financial services industry, that was [acquired](#) by S&P Global earlier this year.

"Economic uncertainty will continue well into next year, with likely recessions in both Europe and North America and further monetary policy tightening by central banks in their efforts to combat historically high inflation rates, while the continuation of geopolitical uncertainty and instability will continue to impact global financial markets," said **Ken Wattret, Head of Europe-Commonwealth of Independent States (CIS) Insights & Analysis, S&P Global Market Intelligence**.
