

CERAWeek by S&P Global 2024 to Convene Energy CEOs, Government Officials and Business and Technology Leaders in Houston, March 18-22

World's preeminent energy conference to focus on 'Multidimensional Energy Transition: Markets, climate, technology and geopolitics.' Learn more at www.ceraweek.com

HOUSTON, Feb. 26, 2024 /PRNewswire/ -- The 42nd annual gathering of CERAWeek by S&P Global—the world's preeminent energy conference—will convene energy industry leaders, experts, government officials and policymakers, as well as leaders from the technology, financial and industrial communities, March 18-22 in Houston.

[CERAWeek 2024: Multidimensional Energy Transition: Markets, climate, technology and geopolitics](#) will explore strategies for a multidimensional, multispeed and multifuel energy transition—one that reflects different realities and timelines by region, technology, industry strategies, as well as the variety of social and political approaches and divergent national priorities in an increasingly multipolar world.

S&P Global

Chaired by Daniel Yergin, Vice Chairman of S&P Global and author of *The New Map: Energy, Climate and the Clash of Nations*, the conference will explore key elements of this transformative era and what it means for markets, geopolitics, investment, supply chains, technology and competitive strategies.

"The increasing focus on energy transition following COP28 coincides with a growing realization of just how complex the road ahead will be," said Yergin. "Expectations of a linear path to Net-zero are giving way to recognition that this will be a multidimensional energy transition—one that is inclusive of different situations in different parts of the world and takes into account energy security and affordability. The reality of a multispeed transition presents both opportunities and challenges. Meeting those challenges, and realizing the promise, of the new energy future will be the focus of the world's energy leaders at CERAWeek 2024 in Houston."

The CERAWeek 2024 conference program will explore [key themes](#) related to:

- **Energy Markets** – How will supply and demand balance in a world of uncertainty?
- **Policy and Geopolitics** – How will growing global tensions and conflicts reshape the international order?
- **Company Strategies** – Who will prevail and what will be sustainable competitive advantages for companies? Will companies be rewarded for diversification?
- **Power Markets in Transition** – What are the choices and challenges ahead in the face of growing power demand and testing of resilience?
- **New Supply Chains for Net Zero** – Where are the greatest stresses and sources of disruptions? How will the market for hydrogen develop? What will reshoring mean for energy?
- **Minerals and Metals** – Where will critical minerals and metals be sourced and processed? How will this shape the energy transition, and future geopolitics?
- **Climate and Sustainability** – How will decarbonization proceed and how will climate goals coexist with priorities around economic growth, security, affordability and access? What will be the approaches to implementing the COP28 commitments?
- **Technology and Innovation** – What role will AI play? How can the deployment and scaling of new technologies be accelerated? What are the next breakthroughs? What are the changing roles for nuclear power, geothermal, mobility, CCUS, battery storage and renewables?
- **Capital Transition** – How will persistent inflation and the higher cost of capital impact energy and infrastructure investment? What is the future of carbon markets, and their impact? What are the emerging

financial strategies?

The week-long event will also include the [CERAWeek Innovation Agora](#), serving as the center of technology and innovation programming at the conference. Featuring a community of thought leaders, technologists, start-ups, investors, academics, energy companies and government officials, the Innovation Agora will showcase transformational technology platforms in energy and adjacent industries ranging across AI, decarbonization, low carbon fuels, cybersecurity, hydrogen, nuclear, mining and minerals, mobility, automation, and more. The 2024 program will also feature expanded "[Agora Hubs](#)"—dedicated areas focused on climate, hydrogen and carbon.

CERAWeek 2024 [speakers](#) will include (partial list):

- Amin H. Nasser – President and CEO, Saudi Aramco
