

CERAWeek by S&P Global 2025 to Convene Energy CEOs, Government Officials and Business and Technology Leaders in Houston, March 10-14

World's preeminent energy conference to focus on Moving Ahead: Energy strategies for a complex world.' Learn more at www.ceraweek.com

HOUSTON, Feb. 10, 2025 /PRNewswire/ -- The 43rd annual gathering of CERAWeek by S&P Global—the world's preeminent energy conference—will convene energy industry leaders, experts, government officials and policymakers, as well as leaders from the technology, financial and industrial communities, March 10-14 in Houston.

S&P Global

[CERAWeek 2025: Moving Ahead: Energy strategies for a complex world](#) will examine an era of multifaceted change—in policy, technology and geopolitics—that is reshaping the global energy landscape.

Chaired by Daniel Yergin, Vice Chairman of S&P Global and author of *The New Map: Energy, Climate and the Clash of Nations*, the conference will explore a multitude of factors—and the underlying issues and linkages between them—that have profound implications for markets, investment, supply chains, geopolitics and competitive strategies.

"When it comes to charting pathways to the energy future, change is proving to be the one constant," said Yergin. "New governments and regulatory shifts, the transformative potential of artificial intelligence, technology advances, continued fragmentation of the global economic order, geopolitical rivalry and persistent conflict—these are just some of the factors with the potential to challenge assumptions and impact plans. Successfully navigating this evolving landscape and meeting the world's need for secure, reliable and affordable energy will require keen insights and innovative strategies. This will be the focus of the world's energy leaders at CERAWeek 2025 in Houston."

The CERAWeek 2025 conference program will explore [key themes](#) related to:

New Policies and Shifting Regulations— How will shifts in energy, climate and trade policies test investment approaches worldwide—and how will the new administration in Washington redefine the outlook?

Oil and Gas— How to navigate short- and long-term market uncertainties amid a changing demand outlook, shifting policies and a rebalancing of global supply.

Power, Grid and Electrification— What policies, mix of natural gas and renewables, technologies and systems will be needed to meet a coming demand surge from the electrification of the energy system and emergence of AI?

Renewables and Low-Carbon Fuels— How is the policy outlook changing for wind, solar and biofuels, as well as for hydrogen and other low-carbon fuels and how could it impact deployment going forward?

Geopolitics— How to navigate geopolitical competition that is making energy markets, trade flows, investment decisions, technology choices and energy transition more complicated.

Trade and Supply Chains— How will an increasingly fragmented global trade system impact energy flows and economic growth?

The Capital Transition – How to mobilize capital to meet current energy needs and move towards a lower emissions energy system amid policy risks, trade tensions and geopolitical disruptions while delivering returns to stakeholders.

Business Strategies – How are companies evaluating, adapting and pursuing diverse strategies and business models to support the needs of today's energy system while positioning themselves for the future?

Mobility and Transportation – How will energy, power, automotive and technology company strategies adapt amid shifts in government policies and consumer demand?

Minerals and Mining – How to reconcile growing demand for critical minerals for the energy transition with persistent challenges such as long lead times, regulatory hurdles, trade tensions and local issues of access.

AI and Digital – How can AI and other digital technologies transform the ways energy is produced, managed and consumed? How can the power sector meet surging electricity needs from datacenters and energy transition demand?

Managing Emissions – How can industry, policymakers and capital providers align strategies to accelerate and expand decarbonization technologies while maintaining competitiveness and growth?

Technology and Innovation – What models of innovation are advancing the development, deployment and scaling of key technologies across the energy landscape?

Climate and Sustainability – How will post-COP29 strategies evolve within a polarized political and economic landscape and a new administration in Washington?

The week-long event will also include the [CERAWeek Innovation Agora](#), serving as the center of technology and innovation programming at the conference. Featuring a community of technologists, startup entrepreneurs, venture capitalists and investors, thought leaders, policymakers and corporate innovators, the Innovation Agora will showcase transformational technology platforms in energy and adjacent industries ranging across AI, decarbonization, low carbon fuels, cybersecurity, hydrogen, nuclear, mining and minerals, mobility, automation, and more. The 2025 program will also feature "[Agora Hubs](#)"—dedicated areas focused on climate, carbon and new energies.

CERAWeek 2025 [speakers](#) will include (partial list):

- H.E. Dr. Amani Abou-Zeid – Commissioner for Infrastructure, Energy and Digitalisation, African Union
- Shaikh Nawaf Al-Sabah – Deputy Chairman and CEO, Kuwait Petroleum Corporation
- Hon. Tom Alweendo – Minister of Mines and Energy, Ministry of Mines and Energy, The Republic of Namibia
- Murray Auchincloss – CEO, bp plc
- Alan Armstrong – President and CEO, The Williams Companies
- Christian Bruch – President and CEO, Siemens Energy
- Jim Fitterling – Chair and CEO, Dow
- Jack Fusco – President and CEO, Cheniere Energy
- Richard Haas – Senior Counselor, Centerview Partners; President Emeritus, Council on Foreign Relations
- Harold Hamm – Executive Chairman, Continental Resources
- Russell Hardy – CEO, Vitol
- John Hess – CEO, Hess Corporation
- Vicki Hollub – President and CEO, Oxy
- Richard Holtum – CEO, Trafigura
- Josu Jon Imaz – CEO, Repsol
- Ditte Juul Jørgensen – Director-General for Energy, European Commission
- John Ketchum – Chairman, President and CEO, NextEra Energy
- Scott Kirby – CEO, United Airlines
- Markus Krebber – CEO, RWE AG
- Sanjiv Lamba – CEO and Member of the Board of Directors, Linde
- Ryan Lance – Chairman and CEO, ConocoPhillips
- Amin Nasser – President and CEO, Saudi Aramco
- Meg O'Neill – CEO and Managing Director, Woodside Energy
- Anders Opedal – President and CEO, Equinor
- John Pettigrew – CEO, National Grid
- Pedro J. Pizarro – President and CEO, Edison International
- Marcel van Poecke – Chairman of Energy, The Carlyle Group
- Maria Pope – President and CEO, Portland General Electric
- Ruth Porat – President and Chief Investment Officer, Alphabet and Google
- Patrick Pouyanné – Chairman of the Board and CEO, TotalEnergies
- H.E. the Hon. Dr. Kevin Rudd AC – Former Australian Prime Minister, Australian Ambassador to the United States

- Wael Sawan – CEO, Shell
- Lorenzo Simonelli – Chairman and CEO, Baker Hughes
- Hon. Danielle Smith – Premier of Alberta, Government of Alberta
- Michael Smith – Founder, Chairman and CEO, Freeport LNG
- Dong Sub Kim – President and CEO, Korea National Oil Corporation (KNOC)
- Tengku Muhammad Taufik – President and Group Chief Executive Officer, PETRONAS
- Ernie Thrasher – CEO, Xcoal Energy and Resources
- Torbjörn Törnqvist – Co-founder and Chairman, Gunvor SA
- Olu Verheijen – Special Adviser on Energy to President Bola Ahmed Tinubu, Office of the President of the Federal Republic of Nigeria
- Maarten Wetselaar – CEO, Moeve
- Mike Wirth – Chairman of the Board and CEO, Chevron Corporation
