

S&P Global Expands Collaboration with Databricks with the addition of S&P Capital IQ Pro datasets via Delta Sharing

Additional S&P Global datasets available via Databricks Delta Sharing include financials, estimates, filings, transcripts, transactions, sustainability and more

NEW YORK, May 28, 2025 /PRNewswire/ -- S&P Global (NYSE: SPGI) announced today the addition of several S&P Capital IQ Pro datasets available in Databricks. Powered by Databricks Delta Sharing, this enhanced collaboration between S&P Global and Databricks, the data and AI company, allows users to directly access and query a wide array of additional S&P Global datasets, including financials, estimates, filings, transcripts, transactions, sustainability across investment management, risk, and competitive intelligence use cases — all without the need for data ingestion.

S&P Global

Delta Sharing is Databricks' open-source protocol that enables customers to share live data across platforms, clouds and regions within an environment with strong data security and governance. With Delta Sharing, licensed users can directly query live S&P Global data without creating copies or managing complex pipelines. This greatly reduces data duplication and latency issues, allowing investment, risk, and strategy teams to always work with fresh data—all within their existing Databricks environment.

"In today's dynamic market, it is essential that we meet our clients where they are," said **Warren Breakstone, Head of Data & Research at S&P Global Market Intelligence**. "Our expanded relationship with Databricks enables us to deliver more seamless access and efficient querying, empowering clients to make informed business decisions through comprehensive analysis and insights. We are excited to enhance the availability and reach of our data through Databricks and Delta Sharing, ultimately benefiting our customers and their decision-making processes."

"As financial services demand for data intelligence grows, expanding on our collaboration with S&P Global bolsters our customers' ability to seamlessly, securely share data across platforms," said **Junta Nakai, VP and Global Head of Financial Services at Databricks**. "We are thrilled to be working with S&P Global to integrate a deep and unique set of insights from S&P Capital IQ Pro datasets into Databricks via Delta Sharing."

S&P Global's collaboration with Databricks previously included the integration of its energy and commodities datasets from its Commodity Insights division in Databricks. The Market Intelligence division also collaborated with Databricks on its S&P Global Capital IQ Workbench, creating a collaborative analytics notebook environment for its users.

S&P Global will continue to add additional datasets to Databricks [Delta Sharing](#). View all the S&P Global datasets that are accessible via Delta Sharing on the [S&P Global Marketplace](#) and Databricks Marketplace.

About S&P Global

S&P Global (NYSE: SPGI) provides essential intelligence.
