

S&P Global Market Intelligence Unveils GenAI-Powered Enhancements to Capital IQ Pro and Expands Insights in Private Markets and Energy Transition

- *New Capital IQ Pro GenAI capabilities strengthen long-term planning and strategic decision-making for customers*
- *Enhanced private markets coverage adds headcount and people data to meet rising market and customer demand*
- *Energy Transition dataset broadens to include data center services and infrastructure content, as well as production data from S&P Global Commodity Insights*

NEW YORK, June 25, 2025 /PRNewswire/ -- With growing market needs to accelerate decision-making and uncover key insights across growing industries, S&P Global Market Intelligence enhances the S&P Capital IQ Pro platform with new GenAI-powered capabilities and expansion of data in private markets and energy transition.

The latest GenAI enhancements to Capital IQ Pro elevate the platform's Document Intelligence and charting capabilities, designed to empower users with advanced tools for strategic decision-making and long-term planning. With the addition of headcount and people data for private companies, S&P Global Market Intelligence, a provider of information services and solutions to global markets, is responding to the growing demand from customers seeking deeper insights into private markets. The expansion of Energy Transition data now includes vital information on data center services, infrastructure content and production data sourced from S&P Global Commodity Insights, equipping customers with the critical data needed to navigate the evolving energy markets.

"Our approach is to bring the best of GenAI to our clients to enhance the experience with the data, tools and capabilities they rely on today," said **Warren Breakstone, Head of Data & Research at S&P Global Market Intelligence**. "At the same time, we continue to add differentiated new data and content to Capital IQ Pro to reflect our clients' current and future needs."

Key highlights from S&P Capital IQ Pro's latest release include:

Enhanced charting with GenAI and new metrics— Users can now quickly obtain a comprehensive overview of a company's performance with the introduction of Chart Explorer — a GenAI-driven summary of news and significant events displayed on stock charts. Paired with comprehensive data and best-in-class charting technology, Chart Explorer efficiently summarizes key insights and trends observed from a company's price movements or performance within a selected time range. Streamlining the visualization of a company's performance, and identifying economic trends, is now also further enhanced by the introduction of the 19 most-commonly used financial metrics and 14 macroeconomic data metrics within Chart Builder — strengthening long-term planning and strategic decision-making with even more certainty.

Energy Transition Support: Empowering Clients with Comprehensive Data Insights— The introduction of Data Center Services and Infrastructure content ensures detailed analysis covering 13,000 data centers and 100 metrics across 112 countries, powered by 451 Research. Users can access in-depth research, industry forecasts and advanced mapping tools - providing the data center insights necessary to understand the effects of the increasing demand for AI. The integration of North American production data from Commodity Insights allows users to delve deeper into energy transition trends, offering aggregations of oil, gas, condensate and water data based on wellhead information.

Private Markets Insights: Streamlining Workflows for Enhanced Decision-Making— The latest release enhances workflows within private markets by introducing new headcount data for private companies. Analysts gain critical insights into job roles, departmental structures and attrition rates, facilitating a deeper understanding of a company's strategic direction, operational efficiency and growth potential. The inclusion of new Topic Tags on Market Maps, Screener and Corporate Profiles pages for approximately 90,000 private companies, along with innovative idea generation screens tailored for PE/VC fund managers, accelerates access to relevant insights during fundraising efforts.

Visible Alpha Integration: Elevating Company Analysis— Recent enhancements to the Visible Alpha integration into Capital IQ Pro provide for innovative new peer comps at a company, divisional or segment level, allowing for richer analysis of companies, industries and markets.

S&P Capital IQ Pro is S&P Global's flagship data and analytics platform offering access to deep, meaningful data on the global financial markets, companies and industries that help market participants make informed decisions. It also provides proprietary research and in-depth analysis from thought leaders and industry experts and compresses more than 135 billion data points a year into actionable intelligence.
