S&P Global and Anthropic Announce Integration of S&P Global's Trusted Financial Data into Claude

- *New cutting-edge MCP server developed by Kensho, S&P Global's AI Innovation Hub, enables seamless access to S&P Global unrivaled datasets through Claude by Anthropic*
- *Integration expands how customers, from hedge fund managers to private equity analysts, can access S&P Global's data across the GenAI ecosystem*

NEW YORK, July 15, 2025 /PRNewswire/ -- S&P Global (NYSE: SPGI) today announced a collaboration with Anthropic to bring S&P Global's trusted financial data into Claude by Anthropic. This integration enables financial professionals to answer complex financial questions and get fast, reliable answers grounded in trusted data from S&P Global via Claude.

Financial professionals, from hedge fund managers to private equity and investment banking analysts, need to be able to access crucial financial data wherever their workflows take place. With this cutting-edge integration, customers can unlock S&P Global's trusted data and insights seamlessly and reliably within Anthropic's Claude.

Using Model Context Protocol (MCP), the open standard developed by Anthropic, Kensho developed an MCP server for its solution the Kensho LLM-ready API, which enables LLMs to access a range of S&P Global's datasets, including S&P Capital IQ Financials, earnings call transcripts, and more. Through natural language, clients can now access the same data they rely upon via S&P Global's Capital IQ Pro platform and flexible data feed delivery options, directly in Claude.

"We are excited to continue to partner with leading AI companies like Anthropic to deliver S&P Global's trusted, relevant data and insights wherever our customers need them," said **Bhavesh Dayalji, Chief AI Officer of S&P Global and CEO of Kensho**. "S&P Global is committed to meeting our customers where their workflows take place, ensuring they have options and flexibility when it comes to accessing our trusted data across the AI ecosystem."

This collaboration is part of Anthropic's Financial Analysis Solution, which will add tremendous value for customers of S&P Global and Anthropic who can now access S&P Global's trusted insights via the GenAI application, allowing them to efficiently conduct research.

About the Kensho LLM-ready API

The Kensho LLM-ready API integrates with any large language model, such as Anthropic's Claude or OpenAI's ChatGPT, enabling customers to use natural language to query a range of S&P Global datasets, including S&P Capital IQ Financials, earnings call transcripts, and more. Unlike typical APIs, it is optimized for LLMs by offering a simplified structure that supports

function calling patterns. It comes with a Python library that streamlines everything from authentication to LLM integration. Designed for professionals such as investment bankers, equity analysts, consultants, and other data-driven roles, this LLM-ready API supports efficient retrieval of financial data, including financial statement line items, security identifiers, and company information—ideal for creating pitch books, research reports, and market positioning presentations. The API was developed by Kensho, S&P Global's hub for AI innovation and transformation.

About S&P Global

S&P Global (NYSE: SPGI) provides Essential Intelligence.
