S&P Global Partners with Google Cloud to Expand AI-Ready Data Access to the Commodities Sector

- *S&P Global Commodity Insights data now available in Google Cloud's BigQuery*
- *AI-Ready Data packages include energy, power and gas, metals, chemicals, agriculture, supply chain, and specialized markets*

NEW YORK, Aug. 21, 2025 /PRNewswire/ -- S&P Global (NYSE: SPGI) today announced a partnership with Google Cloud to integrate technology in S&P Global's comprehensive AI-Ready Data portfolio with Google Cloud's robust data, AI, and analytics infrastructure. Data and insights from S&P Global's Commodity Insights business are now available in Google Cloud's BigQuery autonomous data and AI platform.

This partnership is the latest development in S&P Global's strategy to unlock the ability for customers to access data using the ecosystem they already work in, ensuring they have options and flexibility in accessing S&P Global's trusted data across the AI ecosystem.

With Commodity Insights' data now available through BigQuery, customers can utilize energy and commodity data to meet their business' needs while leveraging the power of Google Cloud to boost productivity, improve data governance and compliance, and support timely decision-making in the face of dynamic market conditions. Additionally, customers can experiment, prototype, and drive insights using AI-ready Commodity Insights data.

"This partnership with Google Cloud represents another significant step in our commitment to meeting clients where they are in their digital transformation journey," said **Mark Eramo, Co-President, S&P Global Commodity Insights**. "By making our AI-Ready Data available through Google Cloud's BigQuery platform, we're empowering organizations to harness Google Cloud's advanced data and AI capabilities alongside our comprehensive commodity data to drive innovation and competitive advantage."

The AI-Ready Data packages that are now available through BigQuery sharing cover essential commodity sectors including energy, power and gas, metals, chemicals, agriculture, supply chain, and specialized markets.

Powered by S&P Global's Enterprise Data Organization, the AI-Ready Data format is specifically designed for machine learning and artificial intelligence applications, and provides clean, structured datasets that enable faster model development and deployment.
